The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 12, 13, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Fischer et al.

Please see lines 33-38 of column 3 of Fischer et al. Regarding claim 13, note that Fischer et al. show two rows 58, 60 of tubes provided; thus presumably two sets of tube receiving holes would be provided, connecting these rows to the first and second header chambers formed by the partition.

Regarding claim 19, the recitations concerning how the communication passage is formed carry no weight to distinguish since a punched hole would be structurally indistinguishable from one formed in another conventional manner.

Claims 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer et al.

Fischer et al. do not give specific dimensions for the header wall thickness. In the case of the illustrated folded sheet header, obviously the partition thickness will be twice the sheet thickness, but in the case of the extruded embodiment the relative thickness of the dividing partition could be selected as desired. It would have been obvious to one of ordinary skill in the art at the time the instant invention was made to provide relative dimensions for the circumferential wall thickness, and partition thickness, based on the

requirements of a given application. Being able to withstand internal pressure and being rigid enough structurally for enduring assembly, vibration in use, etc. are the main stipulations for such a multichambered header, and one of ordinary skill in the art would be aware of these requirements and well able to select appropriate thicknesses for the container wall and partition wall to suit the requirements of any given application.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
